Software development for Mac, iPhone and iPad

Quick license registration of RubenSoft software by using xml file

How to carry out?

We provide a xml file.
Just drag this file to TopAddress or TopAgenda icon after installation.

Additional information:

- You can drag the xml file to the application icon or to the icon dock.
- The Application can be closed or launched
- The xml file can be stored on an USB key or on a remote volume.
- If the application is already registered, a new license number replaces the old one.
- If you register a PackOrganizer license, you have to carry out the registration only once on any software of PackOrganizer.
